ThinkTech
share, research, publish.

2009

There are no limitations on content or format. You distribute the information you think is relevant in the digital format that represents it best.

The world of scholarly publishing is changing. ThinkTech gives you the tools to change with it.
For scholarship to be truly valuable, it must be shared.

ThinkTech allows you to share your scholarship with the academic community in a convenient, timely manner.

When you share your scholarship, you have the opportunity to influence the trends of your academic field and the lives of people around the world.

By sharing your work through ThinkTech, you promote not only your research but Texas Tech University as a research institution.

Research is more than an article in a journal.

ThinkTech enables you to conduct research in a new way by providing access to materials traditional publications cannot.

Discover:
• Gray Literature
• Video
• Audio
• Images
• Data Sets
• Charts/Graphs

By using ThinkTech for your research, you no longer have to wait on lengthy publishing cycles to find the most current work.

Now you can publish your research on your terms.

ThinkTech provides you with new and exciting alternatives for the distribution of your scholarship.

Unlike traditional publishing, you conveniently publish your research anytime, anywhere.

You increase exposure to your research without sacrificing your copyright.

By publishing in ThinkTech, your work is consistently available and safely archived.
